Lab 1 Exercise 2

1. Download text file `test01.txt` in directory `test`.

2. Copy `text01.txt` to `text01`

3. Create in directory `test` a hard link named `t1` to `text01`

4. Create in directory `bin` a hard link named `t2` to `t1`

5. List all files, and their attributes, in `ex1` and its subdirectories

6. Explain the meaning of the number of links associated to each file or directory.

7. Remove file `text01`, and display the content of `t2`. Does it work? Why?
